DIAMOND CORE DRILLING COMMENCES AT
YUINMERY COPPER-GOLD PROJECT IN W.A.

Empire Resources Limited (ASX code: "ERL") advises that diamond core drilling has commenced at the advanced Just Desserts prospect at the Yuinmery copper-gold project in Western Australia.

The first drill hole will test the mineralisation at approximately 350 metres vertically below ground level. The total downhole length is expected to be approximately 500 metres.

The drill hole to date has intersected visible sulphide mineralisation containing copper minerals (visual estimate is approximately 3% chalcopyrite within pyrrhotite equating to approximately 1% copper) believed to be part of the Upper Lens of mineralization in the interval of approximately 403 to 406 metres down hole. Further details will be made available when they are to hand. These results must not be taken so as to unreasonably imply that potentially economic mineralisation has been discovered.

The program will include at least three holes and is planned to be followed by an RC drill programme to commence at the end of November.
